Hello Scott,

I too hope all is well with you and your family.

To approve your request I have to check our agreement. I do not have an electronic copy of that agreement and will have to go into the office next week to get my copy unless you can email me a copy? I believe the agreement states that the sampling of all of the wells would then occur during the next yearly scheduled sampling event in August, 2021. Can you show that the agreement has something different? Either way it turns out, I need to be onsite when the last sampling occurs.

Also in looking at the last sample results, I did not see a trip blank sample analysis. Were trip blank samples utilized for this sampling event as I thought the sampling plan/QAPP called for then?

Thank you,

Duane Newell

Subject: JC Hunt Wolf Creek Spill Annual Report

Duane,

I hope you had a Happy Thanksgiving holidays and hope that you and your family are avoiding the virus. This is a very strange time we are in.

Attached is the annual report for the annual JC Hunt Groundwater monitoring project up on Wolf Creek Pass. Per previous discussions with Pete Stevenson, we had agreed that once MW-1 was below clean up goals that we would then sample all remaining wells to confirm if the impacts in all wells had attenuated to below cleanup goals. With MW-1 being reported as ND during the most recent sampling, we would like to request authorization to proceed with sampling all wells and hopefully move this site to closure. Please let me know if you would like to discuss the report and our finding or if we can move forward. Thanks.

Scott
